Yaswanth Narayanan

QA Automation Engineer | Deep Learning Enthusiast | Data Analyst
Volunteer | Data Science Blogger | Gamer
Tamil Nadu

Summary

Skilled in SQL, Requirements Analysis, Agile Methodologies, and Software Project Management. I do carry working experience in Waterfall, Agile environment – Scrum & Kanban methodologies and possess Strong knowledge in Functional Testing and good understanding on phases of SDLC & STLC.

Have handled the defects through Bug tracking tools like JIRA and TFS, also have been well versed in developing Test Plan, Test Cases and generate Test Summary Reports and a seasoned campaigner in creating Requirement Tractability Matrix (RTM) and good command on documentation.

Having acquired experience with automation testing through Katalon studio, I have helped automate the manual test scripts to reduce the manual labor. I also possess strong working knowledge in API Testing using SOAP UI, REST API

A Keen Machine Learning enthusiast who deployed deep learning models like NLP, CNN to help the organization perform better across different domains and also helped the organizations to visualize the data to better understand the performance of the metrics. I have always been an active member of the data science community to help solve various problems.

I also blog about the various data science projects that I get to be a part of and have helped other aspiring data scientists with their machine learning models. I have always had an eye for data analysis to find new and interesting trends to help the business perform better.

Experience

Sirahu Technologies

Software Engineer

May 2018 - Present (2 years 11 months)

Madurai, Tamil Nadu, India

-Worked on developing a Deep Learning model to understand the customers' sentiments over the organization's product using NLP techniques

-Worked on creating a dashboard to help clients visualize the performance of the API scripts across different builds, clients, client regions. Created the data visualization using R's flexdashboard and helped my management to present this to the clients
